## Westover FVIW

**The FVIW Series microscopes** utilize coaxial illumination to provide the user with a critical view of fine scratches, making them the ideal choice for factory post-polish, component assembly, and QC inspection of fiber connectors.

The FVIW systems incorporate an attached 9" or 12" monitor that is inclined backward 22.5°. These units also include a 2.5mm universal adaptor for viewing the most common types of connectors. Additional adaptors can be purchased separately.
