GMS

Generic Measurement Software

The GMS Generic Measurement Software is a very easy to use software designed to work with almost all of JGR's products for full test customization.

Compatible Products

RL1 Return Loss Meter

BR1 Backreflection Meter

SX1 Optical Switch

PDL1 Polarization Dependent Loss Meter

BR5 & **MBR5** Backreflection Meter

SX4 & **SX8** Optical Switch

KEY FEATURES
- Production Friendly
- Export to Excel
- Customizable test profiles

APPLICATIONS
- Cable Assembly Testing
- Ribbon Fiber testing
- Single and multifiber testing
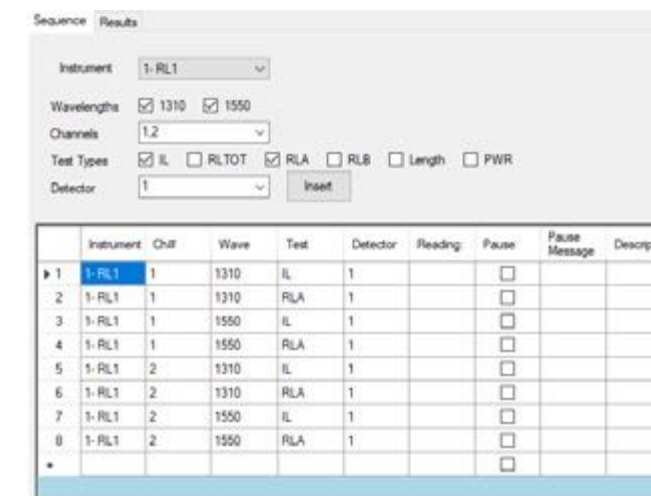

REQUIREMENTS
- Windows 7/10

	Instrument	Ch#	Wave	Test	Detector	Reading:	Pause	Pause Message	Description
▶ 1	1- RL1	1	1310	IL	1	0.10	☐		
2	1- RL1	1	1310	RLA	1	66.50	☐		
3	1- RL1	1	1550	IL	1	0.20	☐		
4	1- RL1	1	1550	RLA	1	64.70	■		
*							☐		

Pass/fail results

Set device specifications for custom colour coded pass/fail results

Flexible Test profiles

Compatible with nearly the entire JGR product line, the GMS software allows for the ultimate in test flexibility. Test profiles can be created by selecting the instrument you wish to use along with inserting the associated command in a sequence based test.

Easy Long-term Measurements

Automated long term measurements can be configured with custom delays, # of iterations or for a set total test time.

Excel integration

Results can be automatically exported to excel upon completion of a test. An Excel template can be used to customize label print outs and reports. Long term measurements can also be exported to one single excel file for easy data analysis.
