

The PTS software allows for automated control your JGR polarity testers through an easy to use dedicated Windows application.

Compatible Products

PT1 Polarity Tester

PT5 Polarity Tester

MS4 Polarity Tester

KEY FEATURES

- Simple Pass/fail
- Auto detect polarities
- Export to Excel
- VFL mode

APPLICATIONS

- Cable Assembly Testing
- Ribbon Fiber testing
- VFL troubleshooting

REQUIREMENTS

- Windows 7/10

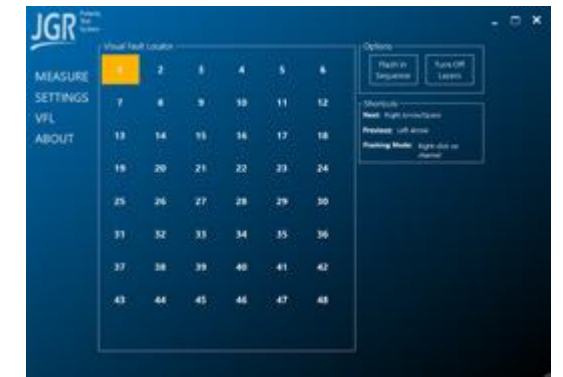

Quick Traceable Testing

Manually confirming the polarity of cable assemblies is a very time consuming. The PT1 Polarity Tester can test 12 Channel assemblies in < 2 seconds. The instrument helps eliminate operator error regarding fiber configurations.

VFL mode

Enable a specific fiber LED with a visible red light for quick visual troubleshooting.

Auto Detect Polarity

Polarity Types A, B, C or D can be auto detected. Users can also auto detect custom configurations.

Nearly Instant Results

- 12 Fibers: 1 second
- 24 Fibers: <1.5 seconds
- 48 Fibers: <2.0 seconds
- 144 Fibers: <5 seconds
- 288 Fibers: <10 seconds.
